Dear Valued Customer:

Subject: Child-Resistant Closure Protocol Test Results for:
20mm CR Purse-Pak Closure and Vial

Enclosed with this letter is a copy of the results of the protocol test conducted with children and senior adults on child-resistant closures produced by Berry Plastics.

It is important to note that on the protocol test results we are sending to you we have recorded the container type and size, the closure components including the liner, the package preparation conditions, as well as the test conditions. The closures, lining materials, and containers selected by Berry for protocol testing are not intended to duplicate any specific customer packages or specifications.

It is particularly important that you, as the packager using child-resistant packaging, carefully monitor the performance of your production line and the performance of your package in the marketplace since both the Poison Prevention Packaging Act as administered by the Consumer Product Safety Commission and the Federal Insecticide, Fungicide, and Rodenticide Act as administered by the Environmental Protection Agency place the responsibility for proper performance of special packaging on the packager.

Further significance of these protocol test results lies in the fact that they in no way imply CR closures will perform under all conditions of application, package storage and package handling or will perform satisfactorily on containers of a different size and shape. These studies do document that the Berry closure has the capability to fulfill the child and senior adult re-securing requirements as per the current Code of Federal Regulations (CFR) Title 16, Part 1700.

Lastly, whether you accept the Berry protocol data or elect to generate protocol data on your own specific packages can only be determined after you have considered all the requirements for child-resistant packaging, as detailed in the regulation applicable to your particular product and have discussed this entire matter with your legal counsel.

We certainly hope the enclosed information will be helpful to you. If you have any questions concerning it, we would be pleased to discuss them with you.

Sincerely,

A handwritten signature in black ink that reads "Kristi J Ritter". The signature is written in a cursive, flowing style.
